Use LLM to generate Prompts

Prompting Best Practices

AI Red Teaming

AI Red Teaming Roadmap

— Provide few-shot examples for structure or output style you need

— Keep your prompts short and concise

— Ask for structured output if it helps e.g. JSON, XML, Markdown, CSV etc

— Use variables / placeholders in your prompts for easier configuration

— Prioritize giving clearer instructions over adding constraints

— Control the maximum output length

— Experiment with input formats and writing styles

— Tune sampling (temperature, top-k, top-p) for determinism vs creativity

— Guard against prompt injection; sanitize user text

— Automate evaluation; integrate unit tests for outputs

— Document and track prompt versions

— Optimize for latency & cost in production pipelines

— Document decisions, failures, and learnings for future devs

— Delimit different sections with triple backticks or XML tags
